To whom it may concern

Coca-Cola Bottlers Japan Inc.

Coca-Cola Bottlers Japan Holdings' measures to prevent heat stroke among our employees

During this outbreak of COVID-19, the safety and health of our consumers, our customers and our employees is our number one priority and we have been working with comprehensive business continuity actions in place to ensure safe and secure product supply.

Even after the emergency is lifted, our company continues to check employees' physical condition on a daily basis and encourages them to disinfect with alcohol after washing hands, gargle and wear masks.

Due to the increase in temperature and humidity during the summer, we may remove the mask while driving in a car with no passengers, in a well-ventilated place, in a place where there are no people around, or while working in a truck or a company vehicle to prevent heat stroke.

We would appreciate your understanding.
