Coca-Cola Bottlers Japan Inc.

Apology for temporary product supply shortage in some regions

Thank you very much for your patronage of Coca-Cola Company products.

We would like to express our sympathies to those who have suffered from the recent heavy rain and flooding in western Japan. We strongly hope that everyone in the area can return to their normal lives as soon as possible.

As announced previously, our Hongo factory located in Hiroshima Prefecture and its adjacent logistics center have shut down operations after experiencing flooding due to the recent heavy rain.

In addition, due to the ongoing record hot weather, demand for beverages has expanded and we have been experiencing a temporary shortage of product supply in some areas. We apologize for any inconvenience to our consumers and customers. We are making every effort to restore the supply of products back to normal levels and we appreciate your kind understanding.

Sincerely yours,
